

Software Developer (Location: Richmond Hill, ON)

The Organization

Microdea Inc, (www.microdea.com) has built a significant practice over the past 15 years in the areas of Imaging, Document Management, Business Process Optimization, Workflow and Integration, and Custom Development. We are a successful organization, located in northeast Toronto, selling directly and with our channel partners throughout North America,

We are passionately committed to the success of our customers and we work hard to build a long term trusted relationship. We deliver what we promise and create value in the process.

With the strong backing of our clients in the Transportation, Healthcare, Education, Insurance and Financial Services sectors, the potential for the growth of sales of our solutions within the North American market is significant. Our long term customer relationships and high customer satisfaction are key competitive advantages in selling new clients. Our products are respected in the marketplace and generate a positive ROI for clients in less than a year.

The Position

We are looking for a professional software developer to expand our team. It is a full time development position in a fast paced team environment, working with the latest technologies to deliver solutions to our clients.

The successful candidate will have a commitment to learning and advancing their skills, keeping abreast of new technologies, methodologies, and trends within software development, as well as meeting the following demonstrable skills:

Mandatory skills

- Solid Visual Studio .Net skills
- Good written and spoken English
- Solid database experience with MS SQL or similar

Desirable skills

- ASP.NET
- Various Windows Workflow and WPF technologies
- University degree or equiv. diploma

Responsibilities

- Use solid knowledge of advanced programming techniques and skills to create complex software solutions
- Design, code and test various application modules
- Assist with customer facing support on modules where necessary

Suggested Experience

- Demonstrable skills and REAL WORLD experience designing, coding, testing, and troubleshooting applications

If you are smart and looking for a challenging and exciting work environment with lots of opportunity to do demanding, interesting and leading edge development, then this opportunity is for you.
